

Seaming tool PS 130, big and strong

For clamping and positioning components with a smooth surface

Simply better.

Your benefits at a glance:

1 Vacuum pumps with control function

The required vacuum is generated with only a few movements of the pump – for a maximum vacuum and top clamping force up to 1,200 N. The status of the vacuum can be checked at any time via a marking ring on the pump tappet and brought back up to the maximum by repeated pumping.

2 Release button

By simply pressing the release button, the vacuum disappears and the seaming tool can be removed quickly.

3 Quick adjusting screw

To quickly adjust the distance, simply undo the screws and slide the suction cups into the desired position via the guide rails.

4 Sturdy construction

The proven BESSEY all-steel rails, which run in anodised aluminium profiles, keep the suction discs on precisely the same level, even under high clamping pressures. This guarantees a precise finished result.

Seaming tool PS 130, big and strong

Order-No.	Opening	Width	Length	kg	V3
	mm	mm	mm		
PS130	5-130	215	715	4.08	

- For clamping and positioning large and potentially heavy components with a smooth surface, such as artificial stone, ceramic, granite, Corian®, plastic, sheet metal and glass
- Manual vacuum pumps for maximum suction power, and therefore a maximum level of horizontal clamping force up to 1,200 N
- Marking ring on the pump lever to permanently check for a reliable vacuum
- Practical quick adjustment function for rapid adjustment of the distance between the two suction cups
